Get instant relief with
"Pape's Cold Compound"

Don't stay stuffed-up! Quit blowing and snuffling! A dose of "Pape's Cold Compound" taken every two hours until three doses are taken usually breaks up a cold and ends all gripe misery.

The very first dose opens your clogged-up nostrils and the air passages of the head; stops nose running; relieves the headache, dullness, feverishness, sneezing, soreness and stiffness.

"Pape's Cold Compound" is the quickest, surest relief known and costs only a few cents at drug stores. It acts without assistance. Tastes nice. Contains no quinine. Insist on Pape's! Ad.

Not Excused.

Artie—Oh! Excuse me, did I step on your foot again?

Gertie—I couldn't say. I did not know you were off yet.

Lift off Corns!

Doesn't hurt a bit and Freezone costs only a few cents.

With your fingers! You can lift off any hard corn, soft corn, or corn between the toes, and the hard skin calluses from bottom of foot.

A tiny bottle of "Freezone" costs little at any drug store; apply a few drops upon the corn or callus. Instantly it stops hurting, then shortly you lift that bothersome corn or callus right off, root and all, without one bit of pain or soreness. Truly! No humbug!—Adv.

GOOD ROADS

KEEP EARTH ROADS IN SHAPE

Engineer of Wisconsin Highway Commission Tells Benefits of Patrol System of Maintenance.

Earth roads will be in existence over wide areas for many years to come, notwithstanding the rapid extension of "permanent" road beds of different materials.

Mr. F. Sergeant, a division engineer of the Wisconsin highway commission, writes:

"After a season's experience with the patrol system of maintenance in division No. 7, where we have practically all earth roads, I am more than ever convinced that this type of road can be fairly well maintained by this system, even where subject to considerable heavy motor traffic.

"A patrol section should not be more than six or seven miles in length and should be taken care of by one man with team. This man should be held responsible for the condition of his section at all times and should be required to devote all of his time to the work.

"The patrolman must have a good team, and the wagon box equipped with a dump bottom. The county should furnish a light two-horse blade grader, road plane, plow, scraper and necessary small tools, such as shovel, pick, bar, brush, scythe, rake, etc.

"In spite of all the claims made for the road drag as a maintenance tool, we find the light blade grader or the road plane far superior to it, and we advocate the use of these tools entirely for road maintenance. We find that a road drag having no bearing except on the blade, has a tendency to gouge out the material in soft spots making them still deeper, and giving the road a bad, wavy surface, while the blade grader or the road plane, having a long wheel base or bearing surface, cuts only on the high spots and distributes the material in low places, building them up and giving the road a nice, smooth, driving surface. A blade grader should be so constructed that one man can drive the team and make all adjustments necessary while the machine is moving, as only one man is required on this work.

"An earth road with low crown and badly sodded shoulders cannot be properly maintained by the patrolman, but should be first trimmed up with a heavier outfit, cutting off and removing heavy sods, properly heaping up the crown, filling low places and opening up drainage.

"The blade grader should not be used on earth roads when they are sloppy, but should be used as soon as the material is dry enough to roll nicely on the blade, and pack into the ruts and depressions. And no great amount of material should be moved at one time; a quarter or half inch cut is sufficient for the best results, furnishing all the material that the blade can distribute evenly. Under ordinary weather conditions the material is in a fair condition to work with the grader for about three days after a rain, giving ample time for three full rounds of the section which should leave even a badly rutted road in fairly good condition. Be sure to always make the first round trip on the center of the road.

"Six inches of crown to a 24-foot driving surface is sufficient. Care should be taken that the roadbed is nicely rounded, and not dragged to a peak in the center or a large ridge of loose earth left there."

ROADS AID RURAL STUDENTS

Much Larger Percentage of Attendance Noted in Sections Where Highways Are Improved.

(Prepared by the United States Department of Agriculture.)

While it is true that various factors contribute to increase or reduce the attendance at schools in given sections of the country, it is worthy of comment that in the states having a high percentage of improved roads a much larger percentage of rural students enrolled regularly attend the schools than in the states having a small percentage of improved roads.

Chauncey M. Depew is a great admirer of Ring Lardner and delights to relate an anecdote concerning the well-known sport writer and humorist. It was at a club in Philadelphia and a certain gentleman whom the crowd were trying to entice into spending the evening there declared he could not remain because he had promised his wife he would come home.

"I'll fix it for you," said Lardner, and darted into the phone booth. Presently he emerged shouting:

"It's all right, old chap, your wife says you can stay!"

"How in the world did you manage to bring her around?" asked the amazed man.

"Easy," replied Lardner. "I told her you were roaring drunk and should I bring you home or keep you here, and she said:

"You can have him, Mr. Lardner!"

The Easiest Way.

"Do you always let your wife have her own way?"

"Yes, and mine, too."

THIS is a topic we all hear now-a-days because so many people are inclined to exaggerate. Yet has any physician told you that we claimed unreasonable remedial properties for Fletcher's Castoria? Just ask them. We won't answer it ourselves, we know what the answer will be.

That it has all the virtues to-day that was claimed for it in its early days is to be found in its increased use, the recommendation by prominent physicians, and our assurance that its standard will be maintained.

Imitations are to be found in some stores and only because of the Castoria that Mr. Fletcher created. But it is not the genuine Castoria that Mr. Fletcher Honestly advertised, Honestly placed before the public and from which he Honestly expects to receive his reward.

Children Cry For

Fletcher's CASTORIA

Special Care of Baby.

That Baby should have a bed of its own all are agreed. Yet it is more reasonable for an infant to sleep with grown-ups than to use a man's medicine in an attempt to regulate the delicate organism of that same infant. Either practice is to be shunned. Neither would be tolerated by specialists in children's diseases.

Your Physician will tell you that Baby's medicine must be prepared with even greater care than Baby's food.

A Baby's stomach when in good health is too often disarranged by improper food. Could you for a moment, then, think of giving to your ailing child anything but a medicine especially prepared for Infants and Children? Don't be deceived.

Make a mental note of this:—It is important, Mothers, that you should remember that to function well, the digestive organs of your Baby must receive special care. No Baby is so abnormal that the desired results may be had from the use of medicines primarily prepared for grown-ups.
